

Integrative Medicine Research Fellowship at Mayo Clinic

The Mayo Clinic General Internal Medicine Research Fellowship Program is pleased to announce that for 2008-2010 one of the fellowship positions will be devoted to Integrative Medicine Research. The Complementary and Integrative Medicine (CIM) Program at Mayo Clinic is active in research, practice and education following the Mayo model of care. The program has several ongoing studies supported by NIH and foundation grants. The accepted fellow will work with and be mentored by one of the several experienced faculty with the Complementary and Integrative Medicine (CIM) Program. In addition, the fellow will be encouraged to collaborate with any of the specialties of choice at the Mayo Clinic. The fellow will also participate in all other aspects of the two-year fellowship research training including attaining a Master's of Science Degree in Clinical Research from the Mayo Clinic College of Medicine. Qualified applicants must be board eligible or certified in internal medicine. Interested applicants should contact Nancy O'Brien at obrien.nancy@mayo.edu or Amit Sood, MD MSc at sood.amit@mayo.edu
